GreenThreads Denver Hiring Pipeline

https://docs.google.com/spreadsheets/d/16Chg_W2Klxqx_HiiDdwo01E0DQFj-Xwk8fIJXlIXtKQ/edit?usp=sharing

The pipeline is stalling before interviews

Executive summary

GreenThreads has an early-stage hiring bottleneck. Of 148 applicants, 64 remain Applied and 42 remain Screened, so 106 applicants have not reached an interview. Long follow-up gaps are the immediate operational problem; compensation is the leading offer-stage concern.

71.62%

**Have not reached
an interview**

43 days

**Longest recorded
contact delay**

\$2,000

**Assistant
Manager offer is
below market**

Three verified findings explain the hiring slowdown

Early-stage volume loss, offer concerns and slow handoffs point to faster follow-up and a targeted pay review.

APPLICANT PIPELINE

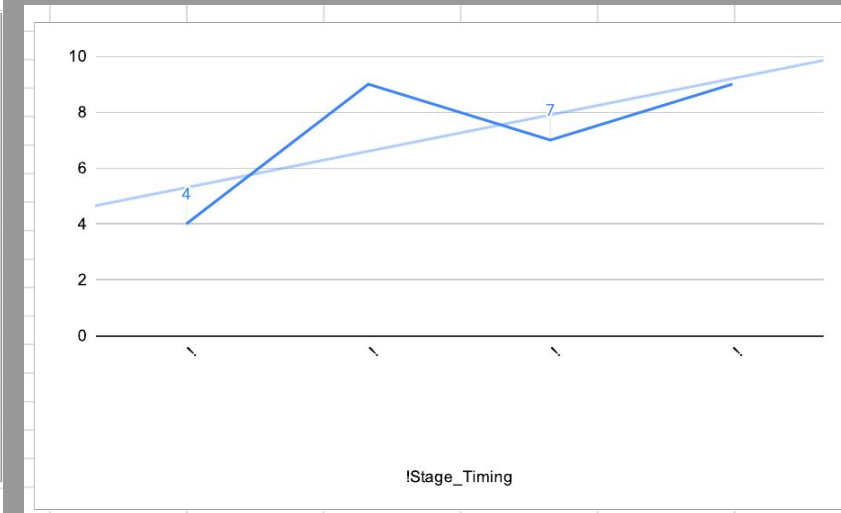

64 Applied • 42 Screened • 24 Interviewed •
7 Accepted • 11 Declined

OFFER DECLINES

Pay below expectations: 5 • Another offer:
3 • Start date too far: 3

STAGE TIMING

4 days • 9 days • 7 days • 9 Days

Takeaway: 71.62% have not reached an interview, while pay accounts for 5 of 11 offer declines and two stage handoffs take 9 days.

A 30-day pilot should improve speed without removing human control

Recommendation

Use AI-supported tracking to identify applicants waiting for follow-up, summarize pipeline stages and prepare reports. Review the \$52,000 Assistant Manager offer against the \$54,000 Denver market rate and consider start-date flexibility.

AI supports the workflow; HR retains final authority over applicant advancement, rejection, hiring and compensation decisions.
